

SPEC SHEET

Plate Cabinet

Specifications

Top is 16 gauge 304 stainless steel #4 finish bound with four 10/32 stainless steel screws flush at each end. No exposed screws on the front or back of the cabinet. Front and back edges turned down to 102 degrees for sleek aesthetics. Corners at precisely 90 degrees for flush alignment to other cabinets. One locking pin at each end to join other G.A. Systems cabinets.

Body of cabinet is 20 gauge galvanized trimmed with 20 gauge stainless steel end panels. Tubular 1-1/2" square stainless steel tubing frames the cabinet's structure to join the end panels. Top frame is 1" square cold rolled tubing, bottom frame constructed from 1" square stainless steel tubing.

Ends trimmed with 22 gauge stainless steel #4 finish trim to accept laminated color panels. Laminate is applied 1/8" board for additional strength.

There is a 3-3/4" clearance from the bottom of the cabinet to the floor. Plate type 3" swivel non-marking casters with brakes.
